ABOUT US:

REVISION offers creative training through the framework of an art studio & gallery. Our goal is to dismiss stereotypes by helping citizens explore their unique assets and connect people of all abilities to opportunities in their own neighborhood.

Revision offers on-going studio sessions, inclusive workshops, and public events centered around the creative arts and environmental conservation. Revision provides a space for emergent and established creatives to work together, in visual art and social practice. We aim to integrate marginalized individuals into collaborative opportunities with local and international businesses, to promote independent art sales and sustainable connections. We partner with progressive institutions, commercial galleries and retail establishments to provide diverse gallery exhibitions for Resident Artists.
